

QUARTERLY COMPLIANCE NARRATIVE - WHITE-LABEL TEMPLATE

ComplianceDocs - v1.0, August 2026.

Plain-language summary written to be forwarded verbatim by the agency to its client, e.g. when the client's auditor, insurer or procurement asks "what is done to keep our website operational and secure?" Maps to DORA Art. 28 / NIS2 supply-chain questions.

Quarterly Website Operations & Compliance Summary Client: [CLIENT NAME] - Site: [SITE URL]
Period: Q[X] 20XX - Prepared by [AGENCY]

What was maintained

During this quarter, [N] updates were applied across your website's platform, plugins and themes. All changes followed a documented policy: security patches within 7 days of release, other updates in scheduled maintenance windows. Every change is recorded in an audit log with date, versions before/after, and operator identity - available as a PDF/CSV export on request.

Risks addressed

- [e.g.] Two plugins with known vulnerabilities were updated, closing publicly documented attack vectors.
- [e.g.] Quarterly restore test completed successfully on [date]: a full backup was restored to a staging environment and verified.
- [e.g.] PHP runtime upgraded from X to Y, maintaining supported-version compliance with the hosting platform.

Continuity posture

Backups are taken weekly, encrypted, stored within the EU, and tested for restorability quarterly. Recovery objective: next business day. Monitoring runs continuously; alerts are retained for 12 months.

Vendor & data processing

Maintenance is performed under a signed data-processing agreement compliant with GDPR Art. 28. All processing and storage occurs within the EU/EEA. Sub-processors are disclosed and change-controlled.
